Lithoss

Mastery in Belgium

Lithoss's commitment to quality is what sets us apart from the rest. With over 20 years of experience, we carefully manufacture each product in Belgium, utilizing premium materials to exceed expectations and maintain the superior craftsmanship that embodies Belgian excellence.

What distinguishes Lithoss is the boundless array of possibilities it offers. From functionality to finish, installation options to personalization, our products cater to every preference. Whether it's selecting a specific finish, customizing with a personal engraving or integrating an assorted door handle, Lithoss tailors to your individual style, drawing inspiration directly from you.

In addition to aesthetics, Lithoss caters to diverse needs with a comprehensive range of product variations. From switches and sockets to USB chargers, sensors and thermostats – all designed to integrate smoothly with advanced automation technology – we provide solutions that transcend mere functionality.

Furthermore, we offer compatibility with various home and building automation systems such as KNX and Casambi, ensuring seamless integration and enhancing the functionality of your space.

Design, Exploration & *Craftsmanship*

Our unique, handcrafted products showcase our dedication to quality and love for design.

We are always on the move, staying updated with the latest trends in interior design, architecture, lighting, home automation and lifestyle. This continuous exploration for innovation has enabled us to stay ahead of the curve and surpass common quality standard for over twenty years.

Elements *of pureness*

Celebrate the essence of pure design with Lithoss, where compromise finds no place. Our sleek and minimalist designs underline the allure of even the smallest Lithoss button. Crafted from exclusive Belgian materials, our products capture the essence of enduring quality. Explore the exceptional solidity of these materials, ensuring products that stands the test of time. Welcome to a world where Lithoss elevates every detail to a standard of timeless sophistication.

Is it any wonder that the Lithoss designs have won several awards?

Living *Textures*

The living
textures
create rich &
subtle accents
in any interior

Unique, hand-made products

Touching a Lithoss switch, socket, or dimmer is to connect with the very essence of Lithoss. You'll immediately sense the quality sensation of raw and authentic materials. Each surface feels vibrant yet subtle, as if delicately brushed by an artist's hand. These rich textures are meticulously crafted through manual processes, such as sanding, polishing, and galvanic treatments in etching baths. Treated with care and attention, they will interact with light; creating a dynamic sensation of color and perception that shifts with the angle and intensity of illumination.

Switches

Select

Design by Bart Spillemaeckers

Lithoss was established at the turn of the century by installer Bart Spillemaeckers to meet the rising demand for exclusive, timeless, and sophisticated switches. The inaugural series, SELECT, set the stage for Lithoss' product range—a collection distinguished by its enduring design.

Over time, SELECT has evolved into a global trendsetter, boasting an impressive portfolio of reference projects, including renowned establishments like Hotel 1898 The Post in Belgium, the Rosewood Hotel in Austria, and Nana Beach Hotel in Crete, Greece.

Comprising a diverse spectrum

of numerous finishes, the SELECT series offers unparalleled customization options for your switches. Through an ongoing process of radical innovation in materials and finishing techniques, the SELECT concept continually evolves. Prepare to be surprised by the timeless elegance and sophistication of SELECT.

Switches

Cockpit

That highly
appreciated
touch
of vintage

Design by Lithoss Design Studio

Cockpit presents the ultimate design solution for your renovation projects. This 6-ampere two-way switch offers straightforward connection to your conventional installation, ensuring convenience and versatility. Available in the renowned stylish finishes of Lithoss, including the bestselling Bronze Antique and the popular Gunpowder Black, Cockpit adds a striking touch to both traditional and ultramodern interiors.

The distinctive character of the Cockpit switch shines through its

handmade finishes and matching toggles. The cone shape evokes a classic and timeless aesthetic, while the knurling adds a sought-after vintage appeal, elevating your switch with a touch of nostalgia.

Dimmers

Dimmers

Design by Lithoss Design Studio

Adjust the atmosphere

For our DIMMER collection, showcasing a contemporary vintage aesthetic, we drew inspiration from the handles and cone-shaped buttons found in a cockpit. Despite how common dimming modules and home automation systems have become, there's still a special satisfaction in physically turning a button to create atmosphere and coziness. Lithoss offers you the opportunity

to do so in style.

The design of the button—whether the traditional cone shape or the diamond-pattern knurl shape—is a testament to true craftsmanship: skillfully shaped with an excellent grip and an authentic touch. Paired with the cockpit switch, you can infuse a contemporary vintage look into your interior with sophistication.

CASAMBI dimmer

Lithoss likes to keep innovating so we are proud to be the only manufacturer in the world to present our wireless CASAMBI dimmer.

Our rotary dimmer allows you to dim light fixtures perfectly in 3 colors: RGB, Tunable White and Mono Color White.

Void

Void

Design by Lithoss Design Studio

Consider the convenience of combining a switch with a socket in one panel.

This section showcases a range of sockets that aligns perfectly with Lithoss' design philosophy. While our Void collection was previously known solely for its square shape, since the end of 2024, we've introduced US sockets, adding a touch of gracefulness to the collection.

To ensure US compatibility, we've expanded our range to include Opera and Britanica.

Within our Void Square collection, you have the freedom to choose the desired module for installation within our 1.8" x 1.8" square opening.

NEW

Pixel

Design by Lithoss Design Studio

Our minimalist fans will undoubtedly love our new Pixel series—a collection of sleek, modern switches designed with smaller buttons for a refined aesthetic. Crafted with the same high-quality experience as our renowned Select series, Pixel seamlessly integrates into any space, offering a perfect balance of style and functionality.

Whether you're upgrading your home or designing a contemporary workspace, Pixel delivers sophistication without compromise.

All of our switches are able to combine with each other to create your ideal aesthetic.

Hotel specials Room service

Design by Lithoss

Over the years, Lithoss has received numerous requests from customers seeking something unique for their hotels. Thanks to our flexibility, many of these requests have been successfully fulfilled. These requests include customized card readers for hotel rooms, personalized room numbers, or combinations of card readers and switches.

Our switches offer the option to be printed or engraved with your desired text or symbols on the button and/or cover plate. Laser engraving, in particular, adds significant value to our products, allowing you not only to see the strength and quality but also to feel them. This attention to detail ensures that our switches not only meet but exceed your expectations, providing a personalized touch to your hotel's interior design.

3. Printing / engraving symbols

To personalize our switches, text (in the language of your choice) or symbols can be printed or engraved on the button and/or coverplate. These symbols can be printed via a special silk-screen process. The color of the print depends on the chosen finish, for example a silver symbol on a gunpowder black coverplate. A true added value to our products is laser engraving so you don't only see the strength and quality of our products, you also feel them. By choosing the correct laser setting you can burn the surface locally in order to obtain a discrete black symbol or laser deeper to make the symbol appear in the base material. Other symbols can be printed or engraved when quality images are supplied.

Engraving our buttons and plates reveals following surface color:

Stainless Steel / Nickel / Brushed brass / Copper / Tin Antique : black

Bronze Antique / Brass Antique : brass

Gunpowder Black : red copper

Ano colors : grey
